

Outstanding Systems Integration – for Increased Productivity

EMCOR Services Combustioneer (Combustioneer) is one of the Washington, D.C., Metropolitan Area’s leading full-service, single-source mechanical, electrical, and building automation and controls firms. Using today’s most advanced technology, Combustioneer helps clients optimize operational efficiency and productivity by integrating a variety of systems—including air conditioning, heating, lighting, power generation, and more. **Combustioneer works to help clients achieve high-performance operation, reduced energy consumption, and maximum cost savings.**

Combustioneer specializes in the design and installation of building automation controls and building automation systems, including the latest internet-based, open-architecture technologies and complex process systems.

Certified Professionals. Top-tier Manufacturer Specialization.

Combustioneer’s Automation Group combines seasoned controls engineers with top-of-the-line LEED-accredited professionals, programmers, and mechanics to provide clients with tightly integrated, centralized operational control. These highly skilled employees are backed by a fleet of service vehicles and thorough instruction, enabling them to work with products and equipment from amongst the best manufacturers on the market.

Certifications include:

- > LEED-accredited professionals
- > Tridium AX certification, JCI-Authorized
- > Authorized Building Controls Specialist (ABCS)
- > Carrier i-Vu open-certified
- > Carrier Comfort Network (CCN) factory trained

Specialized manufacturers include:

- > Honeywell
- > KMC Controls
- > Johnson Controls
- > Tridium

Combustioneer provides a range of services for virtually every component of a facility’s mechanical, electrical, and automation systems. Services include:

Critical Power Services

Emergency power

Generator service

Preventive maintenance

Engineering, Construction, & Energy Services

Design-build

Energy management and saving services

Engineering and construction

We Make Buildings Run Better.

An Exclusive Designation— for a Superior Level of Environmental Responsibility.

Combustioneer was named a MSCA GreenStar Contractor by the Mechanical Services Contractors of America (MCSA), an exclusive designation available only to contractors who have clearly demonstrated a superior record of environmental responsibility. The GreenStar designation illustrates Combustioneer's commitment to environmental responsibility and energy savings. A focus on sustainability and the implementation of long-lasting, reliable systems with the objective of helping clients receive major returns on their investments.

Comprehensive Integration. Unequaled Customer Service.

Combustioneer offers some of the most comprehensive integration of building automation systems in the market—with unmatched customer service to boot.

Our building automation systems, remote access, and building controls include the following offerings:

- > Reliable service
- > State-of-the-art graphics
- > User friendly interfaces
- > Remote access
- > Energy savings
- > 3rd party equipment integration
- > Completely integrated systems
- > Computer-controlled dispatching
- > Remote monitoring and emergency response center, staffed 24/7/365
